

Renewed Space Phase Two

Vision for the renewed space project

'To bring us into the 21st Century presenting a light, welcoming, comfortable building while restoring and enhancing its historic character.'

We want as many people to be involved as possible, we want to hear from every body and everybody's perspective. There will be a limit however to what we can undertake in this phase to make it a deliverable project. We are there for asking people to fill in the table below with a prioritised list of the top three things you would like to see in the areas of valuing people and valuing place.

Valuing People e.g. adding new facilities to the building: Some examples

- Providing more modern toilets with disabled and baby changing facilities.
- Providing a flexible space for use as a crèche or children's work
- Providing running water sink and dish washer for coffee making

Valuing Place e.g. restoring what we've got: Some examples

- Structural repairs to vestry walls and windows
- Cleaning main church brick and stone work
- Replacing lighting with a flexible scheme for different building uses

Valuing People (Providing new facilities in the building)	Valuing Place (Restoring what we've got)
